

LUEANGARAM NATTHIDA

desired position: Data Engineering / Web Development /
Database Management / IT Support

PROFILE

Computer science student passionate about building practical tech solutions. Skilled in web development, databases, and IoT, with experience turning self-initiated ideas into real projects. I've built strong communication and teamwork skills through robotics competitions, public speaking, and academic work. Outside tech, I enjoy music and sports, and I proudly serve as the university country representative of Thailand. I'm seeking an internship where I can apply my skills, creativity, and eagerness to learn.

EDUCATION

2022 - 2026 **Bachelor of Computer Science**
University of Electronic Science and Technology of China
GPAX: 3.78

2019 - 2022 **Satuk School (Maths & Sci)**
GPAX: 3.98

SKILLS

Programming & Web Development

- Java (Servlets, JSP), C, C++, HTML, CSS, JDBC, Git, GitHub, JavaScript (Basic)

Databases

- MySQL, SQL queries, schema design, CRUD operations, indexing, data export/import

Data Analysis & Visualization

- Power BI (dashboard design, trend analysis, SQL-based insights)

IoT & Embedded Systems

- IoT development, STM32 microcontroller, sensor integration, real-time systems, robotics projects

Tools & Deployment

- Heroku, MySQL Workbench, Power BI Desktop, IntelliJ IDEA, VS Code, basic use of Postman

Soft Skills

- Problem-solving, self-driven development, hardware-software integration, technical communication, teamwork

LANGUAGE

- | | |
|------------|---------------------|
| • Thai | Native |
| • English | Higher Intermediate |
| • Chinese | Intermediate |
| • Japanese | Beginner |

PROJECTS

Concert Ticket Booking Website (2025)

Java, Spring Boot, MySQL, HTML/CSS, JDBC, Cloudinary, Railway, GitHub, Power BI

- Built a full-stack concert ticket booking platform with user login, booking, and payment proof upload (Cloudinary). Deployed on Railway with MySQL cloud database. Includes Power BI dashboards for analyzing sales and user region data. Currently expanding to support merch sales.

Smart Agriculture IoT System(2022)

Arduino, Sensors, Mobile Interface

- Created an auto-watering system using sensors and mobile control.
- Integrated pH sensing to check soil friendliness for plant growth.
- Programmed via Arduino for real-time environmental response.

Genius Electric Curtain(2022)

- Designed a curtain that rolls up automatically when detecting sunlight.
- Programmed with light sensors and Arduino to improve energy use and comfort.

RELEVANT EXPERIENCE & TRAINING

Robotics Camp – UESTC, China(2023)

- Selected for a competitive robotics training camp at one of China's top universities for engineering.
- Gained hands-on experience in robotic systems, sensor control, and real-time programming.
- Strengthened collaboration skills by working in multilingual, diverse teams.

Robotics & Coding Competitions

- **Bronze Medal** – Robot Gathering Online Streaming Edition Thailand 2021
- **1st Place** – Engineering & Technology Design Project, 2021
- **1st Place** – School Robot Coding Competition
- **Participated** in TP Maze Runner Robot Online, 2021

Self-Learning & Certifications

- Completed: JavaScript & jQuery from Scratch
- Completed: Ethical Hacking Training
- Completed 50 SQL problems on LeetCode and SQLZoo
- Built multiple tech projects independently via online resources and real-world experimentation
