

ROBOT CAMP

I was in red hoodie

Selected to join the Robocon training camp at the University of Electronic Science and Technology of China (UESTC), organized by the university's official team representing China in ABU Robocon. Collaborated with a team to design and build a functional robot for competition practice. Served as one of the electronic control (电控) members, focusing on circuit design, embedded system programming, and sensor-actuator integration to enable precise robot behavior.

CODDINGS & ROBOTS
